

Playdough recipe

1 cup of cold water
1 cup of plain flour
A few drops of food colouring
2 teaspoons cream of tartar powder
 $\frac{1}{2}$ cup of salt
1 teaspoon of cooking oil

Put the cup of water into a saucepan with a few drops of food colouring. Stir in the cup of plain flour, the 2 teaspoons of cream of tartar, the $\frac{1}{2}$ cup of salt and the teaspoon of oil.

Stir continuously while cooking over a medium heat. The mixture will suddenly transform into a dough like consistency and form into a ball.

Store the dough in airtight plastic bags or boxes.
